

EtherExpress™ PRO/10 Adapters

The powerful LAN connection for Intel486™ and Pentium® processor-based PCs.

Intel's new EtherExpress™ PRO/10 Adapters give you superior networking performance, one-step installation, and standards-based node management for high power workstations. Intel's PRO/10 adapters *with Flash* also provide centralized driver update, on-board storage of PC configuration changes, and pre-boot virus protection.

The following table shows the differences between Intel's new EtherExpress PRO/10 Adapters and the older EtherExpress 16 family.

Product name	EtherExpress 16 Adapter	EtherExpress PRO/10 Adapter
Flash memory version	EtherExpress Flash Adapter	EtherExpress PRO/10 Adapter w/Flash
Price	Competitive	Up to 25% lower!
Performance	Good	30% faster! Will meet or beat any competitors in any benchmark!
Connector options	TPE/AUI	TPE
	BNC/AUI	TPE/BNC (most desired, lower price than card with 3 connectors)
	TPE/BNC/AUI (most desired)	TPE/BNC/AUI
Ease of Installation	Auto hardware configuration	Auto hardware configuration, Plug 'n' Play compatible
	Auto driver install for Flash versions only	Auto driver install for Flash & non-Flash versions
	Flash version can auto-install Novell VLM client	Flash version can auto-install Novell VLM client and Windows DLL config files
Management options	LANDesk™ Express free on BBS	LANDesk Express included in 20packs, free on BBS
		DMI-ready
Power usage	Good	1/3 the power usage
Reliability, compatibility	Good	Higher integration for even higher MTBF
		Fully tested with NetWare 3.12 & 4.01, MS DOS 6.0 & 6.2
Virus Protection	Flash version: checks boot sector & all files each time PC boots up	Flash version: configurable to check only the boot sector (for time savings), or boot sector & all files
	Works in NetWare environments only	NOS independent! Works even if you're not connected to a network
	User can Escape out of virus scan	LAN administrator can configure virus protection such that Escape key is disabled during virus scan
Central driver update	Flash version: updates any EtherExpress Flash card on a Novell LAN	Flash version: updates ANY card on a Novell LAN
	Update drivers only	Update any file (maximum of 10 files at a time) to any node (e.g. new NETX)
Intel backing	Limited lifetime warranty	90 day money-back guarantee and limited lifetime warranty
