

Intel NetportExpress™ Print Server Family

*The easiest way to take control
of your network printing*

The NetportExpress™ Print Server product line is the best way to take control your network printing. The NetportExpress Print Server allows you to utilize new and existing printers while gaining maximum performance and reliability. Most print servers serve only one printer. But the NetportExpress Print Server allows you to connect up to three printers directly to your network, so you can make the most of your scarce printing resources.

NetportExpress XL and EL Print Server Highlights

Performance

- Processes print jobs at incredible speeds... up to 180 Kbps for the XL model.

Ease of use

- Connect up to three printers (2 parallel, 1 serial) anywhere on your LAN in less than 10 minutes.

Control

- Windows*-based software allows you to reconfigure, update and check the current status of all your NetportExpress print servers.
- Integrates with Intel's LANDesk® Management Suite and Novell's ManageWise*
- Manageable from any SNMP console.

Upgradeable

- Flash memory provides simple software upgrades (which are FREE).

Reliable

- Intel's experience, engineering and customer support make it the most reliable print server on the market.

Multi-NOS Support

- NetportExpress XL model supports NetWare* (including 4.1 native NDS support), Windows NT*, UNIX* (SCO, SunOS*, Solaris*, UnixWare*, HP UX, IBM AIX), LAN Manager, LAN Server, and AppleTalk*. NetportExpress EL Model supports NetWare-only environments.

Awards

- Computer Reseller News, Editor's Choice 1995
- Network Computing, Editor's Choice 1995

Warranty

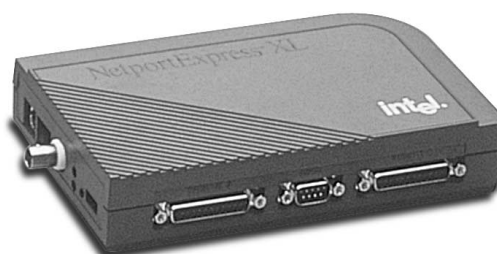

- Three-year warranty
